AMENDMENTS TO THE CLAIMS

Docket No.: 60261(49946)

Please amend claims 126, 128, 144 and 149; cancel claims 1-125, 129-130, 132-143, 145-148, 151-156, and 158 without prejudice or disclaimer; and add new claims 160-164. The following listing of claims will replace all prior versions and listing of claims in the application.

1-125. (Canceled)

126. (Currently amended) A method of resuscitating dormant, moribund or latent *Mycobacterium tuberculosis* bacterial cells, the method comprising contacting the *Mycobacterium tuberculosis* bacterial cells *in vitro* with an isolated polypeptide-selected from the group consisting of:

i) a polypeptide having at least 95% sequence identity with amino acid residues 117 to 184 of SEQ ID NO:2;

ii) a polypeptide having at least 95% sequence identity with SEQ ID NO:2 or; and
iii) a polypeptide comprising at least amino acid residues 117 to 184 of SEQ ID NO:2,
wherein said polypeptide is capable of resuscitating a dormant, moribund, or latent
Mycobacterium tuberculosis cell;

and incubating the <u>bacterial</u> cells in culture medium containing the polypeptide, thereby resuscitating said <u>bacterial</u> cells.

- 127. (Previously presented) The method of claim 126, wherein the polypeptide is recombinant.
- 128. (Currently amended) The method of claim 126 or 127, wherein said bacterial cells are is present in a sample, and the method identifies a dormant, moribund or latent *Mycobacterium tuberculosis* bacterial cell in the sample by detecting growth of bacterial cells in the sample.

129-130. (Canceled)

3 Docket No.: 60261(49946)

131. (Previously presented) The method of claim 126 or 127, wherein the polypeptide is in unit dosage form.

132-143. (Canceled)

144. (Currently amended) A method of resuscitating dormant, moribund or latent Mycobacterium tuberculosis bacterial cells, the method comprising contacting the bacterial cells in vitro with a cell strain expressing a nucleic acid encoding a polypeptide comprising a sequence selected from the group consisting of:

i) a polypeptide having at least 95% sequence identity with amino acid residues 117 to 184 of SEQ ID NO: 2;

ii) a polypeptide having at least 95% sequence identity with SEQ ID NO: 2; and or a polypeptide comprising at least amino acid residues 117 to 184 of SEQ ID NO: 2, wherein said polypeptide is capable of resuscitating a dormant, moribund, or latent *Mycobacterium tuberculosis* cell;

and incubating the bacterial cells and the cell strain in culture medium, thereby resuscitating said cells.

145-148. (Canceled)

- 149. (Currently amended) The method of claim 126, wherein the isolated polypeptide comprises has at least 95% sequence identity with SEQ ID NO:2.
- 150. (Previously presented) The method of claim 126, wherein the isolated polypeptide comprises amino acid residues 117 to 184 of SEQ ID NO:2.

151-156. (Canceled)

157. (Previously presented) The method of claim 126, wherein the polypeptide is purified essentially to homogeneity.

Docket No.: 60261(49946)

158. (Cancelled)

- 159. (Previously presented) The method of claim 128, wherein the sample is taken from a human or animal.
- 160. (New) A method of resuscitating dormant, moribund or latent *Mycobacterium* tuberculosis bacterial cells, the method comprising contacting the *Mycobacterium* tuberculosis bacterial cells *in vitro* with a purified polypeptide comprising SEQ ID NO:2, wherein said polypeptide is capable of resuscitating a dormant, moribund, or latent *Mycobacterium* tuberculosis cell; and incubating the cells in culture medium containing the polypeptide, thereby resuscitating said cells.
- 161. (New) A method of resuscitating dormant, moribund or latent *Mycobacterium* tuberculosis bacterial cells, the method comprising contacting the *Mycobacterium tuberculosis* bacterial cells *in vitro* with a purified polypeptide comprising at least amino acid residues 117 to 184 of SEQ ID NO: 2, wherein said polypeptide is capable of resuscitating a dormant, moribund, or latent *Mycobacterium tuberculosis* cell; and incubating the bacterial cells in culture medium containing the polypeptide, thereby resuscitating said bacterial cells.
- 162. (New) The method of claim 160 or 161, wherein said bacterial cells are present in a sample, and the method identifies a dormant, moribund or latent *Mycobacterium tuberculosis* bacterial cell in the sample by detecting growth of bacterial cells in the sample.
- 163. (New) A method of resuscitating dormant, moribund or latent *Mycobacterium* tuberculosis bacterial cells, the method comprising contacting the bacterial cells in vitro with a cell strain expressing a nucleic acid encoding a polypeptide comprising SEQ ID NO: 2, wherein said polypeptide is capable of resuscitating a dormant, moribund, or latent *Mycobacterium* tuberculosis cell; and incubating the bacterial cells and cell strain in culture medium, thereby resuscitating said bacterial cells.

5

Docket No.: 60261(49946)

164. (New) A method of resuscitating dormant, moribund or latent *Mycobacterium tuberculosis* bacterial cells, the method comprising contacting the bacterial cells *in vitro* with a cell strain expressing a nucleic acid encoding a polypeptide comprising at least amino acid residues 117 to 184 of SEQ ID NO: 2, wherein said polypeptide is capable of resuscitating a dormant, moribund, or latent *Mycobacterium tuberculosis* cell, and incubating the bacterial cells and cell strain in culture medium, thereby resuscitating said bacterial cells.
